Education

Georgia Institute of Technology — Atlanta, GA
Honors B.S. in Computational Media — Expected May 2028

Clubs & Activities: Society of Women Engineers; Girls Who Code; Women in Technology (former VP, KSU)

Experience

Web Development Student Assistant — May 2026 – Present
Georgia Institute of Technology, School of Physics — Atlanta, GA

- Build and maintain the School of Physics website in Drupal, creating 20+ pages and updating 50+ pages for faculty and staff stakeholders.
- Implement responsive HTML/CSS and Drupal updates across navigation, news, and events while meeting accessibility and SEO requirements.
- Translate stakeholder requests into accessible page structures and troubleshoot production content issues.

Undergraduate Research Assistant — Aug 2025 – Jul 2026
Kennesaw State University — Kennesaw, GA

- Co-designed and prototyped CBT-informed mobile features with faculty researchers to support student mental wellness.
- Conducted focus groups and usability testing with 30+ participants; used task-success metrics and System Usability Scale surveys to guide product iterations.
- Presented research findings and design rationale at the Symposium of Student Scholars.

R&D Intern — Jun 2025 – Aug 2025
CJ CheilJedang, Blossom Park R&D Center — Seoul, South Korea

- Analyzed 100+ beverage samples weekly and independently recorded measurements in triplicate to support product development and research comparing fermentation and aging conditions.

Projects

Cardy — Social & Contact-Sharing App — Sep 2026 – Present
SwiftUI, Next.js, TypeScript, Neon PostgreSQL — entercardy.com | App Store

- Collaborated on a three-person team to develop an iOS app for exchanging social profiles and contact information through digital cards, QR codes, shareable links, and nearby phone-to-phone sharing.
- Created interface designs for a wallet-style card experience with customizable themes and sharing controls; helped lead full-stack feature development across the SwiftUI client and Next.js backend.

Mount — Multi-Currency Finance Tracker — Jan 2026 – Apr 2026
React, Vite, Gemini API, localStorage — Website | Code

- Built a finance app for KRW and USD accounts with currency switching that preserves underlying data, live exchange-rate conversion, and one-hour API caching.
- Integrated Gemini-powered budget recommendations and an interactive calendar displaying daily income and expense totals.

Studyflow — Full-Stack Study Planner — Oct 2025 – Dec 2025
Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS — Website

- Built a study planner with subject organization, session scheduling, progress analytics, and a Pomodoro timer; designed a relational data model with Prisma and PostgreSQL and deployed on Vercel.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C#, HTML/CSS
Frameworks & Tools: React, Next.js, Vite, Tailwind CSS, Drupal, Git/GitHub, Vercel
Databases & APIs: PostgreSQL, Prisma, REST API integration, Gemini API
